

## SUBSCRIPTION PROGRAM

### OPEN VIRTUAL DESKTOP ENTERPRISE

The cross platform solution for virtual apps and desktops

#### OVERVIEW

Inuvika Open Virtual Desktop is an open source enterprise class IT delivery platform that sits at the heart of your infrastructure. OVD provides a scalable, secure and flexible platform that you can rely on to deliver on-demand applications and desktops. No matter how small or large an implementation you need the security of a software maintenance plan that provides the latest innovations and ongoing development to support your growing business demands. The Inuvika Subscription Program delivers affordable annual or multi-year based plans that give you the security and peace of mind you need.

#### SOFTWARE MAINTENANCE

Signing up to a subscription plan you gain immediate access to software releases and product enhancements that can help you maintain a competitive edge. It provides access for the duration of the subscription to the source code and binary distributions of Open Virtual Desktop Enterprise not only ensuring you have access to the very latest features but maintenance and security updates. It also provides online technical resources, defect reporting and tracking with level 3 support agreements offered through authorized partners.

#### SUBSCRIPTION TERMS

Inuvika offers a range of plans giving you flexibility and choice with initial terms of one, two and three years. Ongoing subscriptions are renewed annually.

Built in volume discounts based on the order quantity offer savings as your requirements grow and with 100% of costs being an operational expense, budgetary planning is eased. Two and three year terms bring the additional benefits of deeper discounts and price predictability for the agreement term.
