

What's new in MindManager

October 2023

Hey MindManagers,

In exciting news, we're gearing up for our latest release and bringing great benefits to our customers. This update delivers new product features and user experience improvements and sets the stage for future product enhancements.  [Get screenshots](#)

Highlights

- An all-new Jira integration.
- A new sticky notes feature offering a fresh way to visualize ideas.
- Better co-editing with MindManager Files.
- Multiple under-the-hood usability improvements and bug fixes.

Here's a closer look at what's new in greater detail:

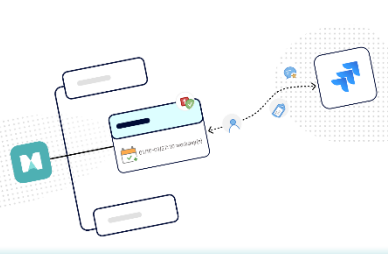

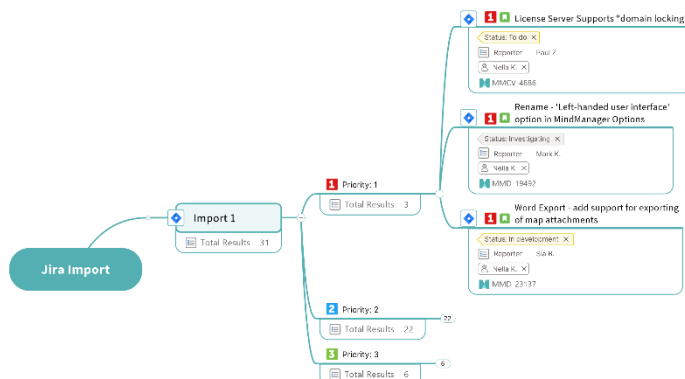

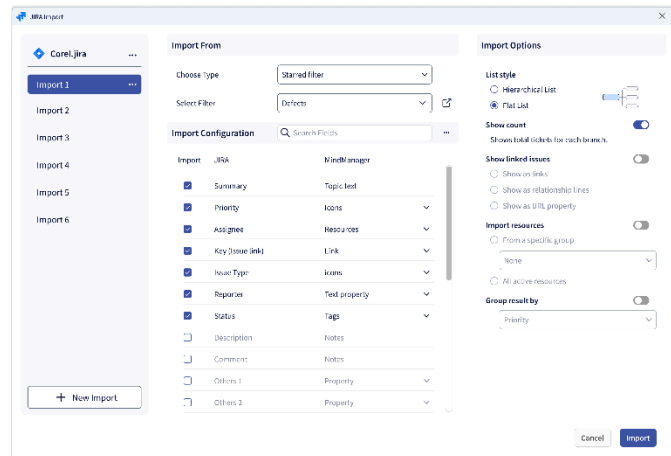

NEW Jira integration*

MindManager Windows

Foster team alignment and keep projects on track with the new MindManager Jira integration. Directly connect your Jira Cloud and Jira Data Center instances to import and manage tickets and issues within MindManager. Explore and filter imported data, apply calculations, set up MindManager SmartRules, and make edits to individual or multiple tickets seamlessly through the MindManager interface.

*Available separately as a paid add-on.

NEW Sticky note topics

MindManager Windows

The addition of new sticky note topics offers customers a fresh way to visualize ideas and invigorates brainstorming. It enables seamless collaboration for both simultaneous and asynchronous teamwork. Users can easily retain their preferred sticky note styles and formatting for future use. Additionally, whiteboarding templates now feature sticky note topics as the default option when suitable.

NEW MindManager Files

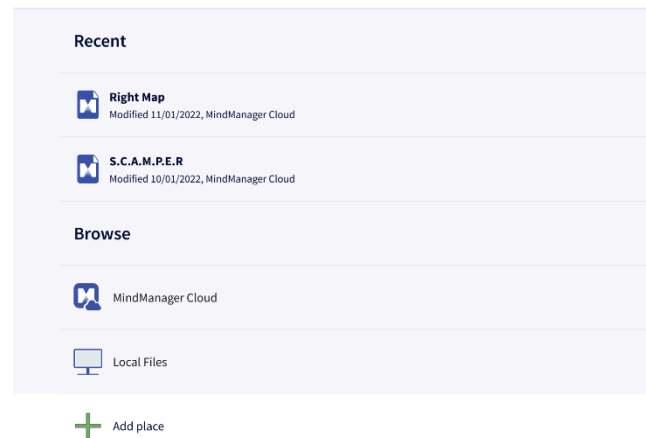

MindManager Web and Chromebook

MindManager has introduced integrated cloud file storage for saved maps, streamlining the process of saving and sharing files. The need for third-party storage is eliminated and it enhances the co-editing experience. Sharing maps for simultaneous and asynchronous collaboration is now achieved with a couple of clicks. All files originating from MindManager Web and MindManager Chromebook are automatically stored in the newly designated "MindManager Files" location.

New My Files Published Files

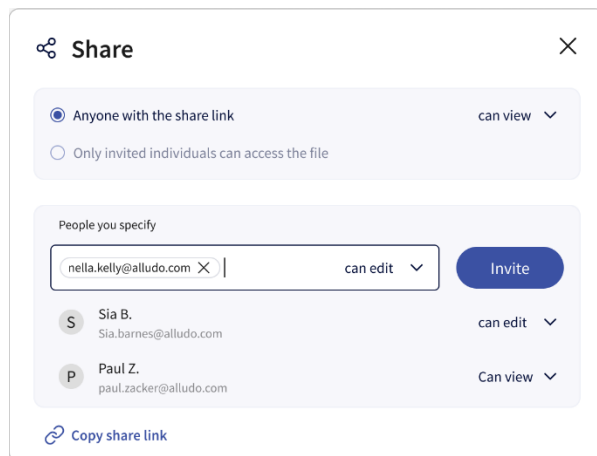

ENHANCED Sharing

MindManager Web and Chromebook

MindManager's sharing capabilities have been revamped for effortless and secure map sharing when using MindManager Files. Users can now easily share files with others without the need to manage individual permissions, and can assign diverse access levels to different users, such as viewing, commenting, or editing rights.

ENHANCED Flowcharting

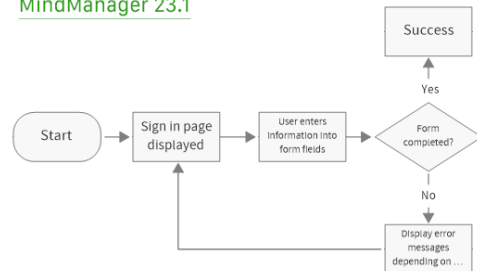

MindManager Windows

Experience enhanced flowcharting in MindManager with improved shape and text management capabilities. Enjoy more screen space and reduced time spent on formatting, as text now automatically adjusts to fit within designated containers. This enhancement helps streamline flowcharting in MindManager for a modernized experience, ensuring consistency throughout your work.

Previous Versions of MindManager

MindManager 23.1

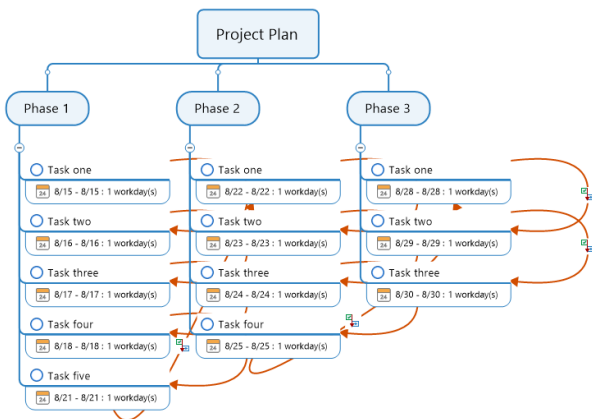

ENHANCED Relationship and dependency routing

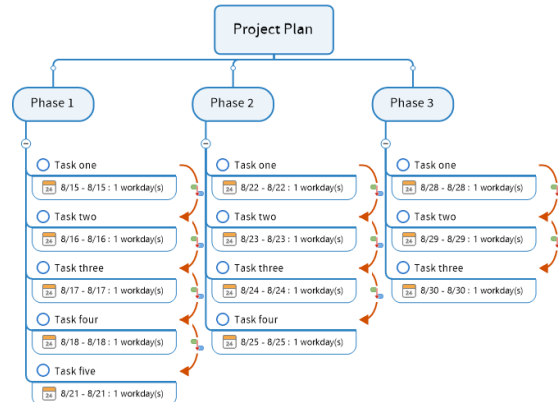

MindManager Windows

Default relationship lines have been intelligently redesigned for visual clarity, guiding you effortlessly through your map's connections and enhancing its visual appeal. With this update, routing follows the shortest logical path to its destination and minimizes crossover with other relationship lines.

Previous Versions of MindManager

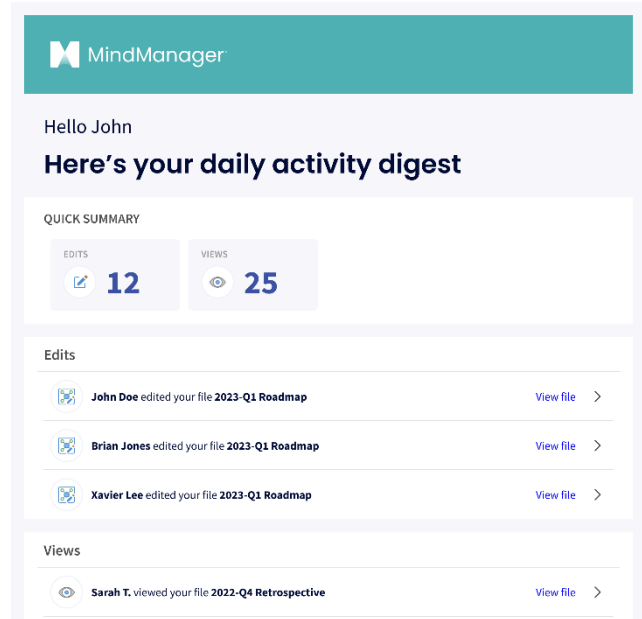

MindManager 23.1

NEW Activity digests

MindManager (all platforms)

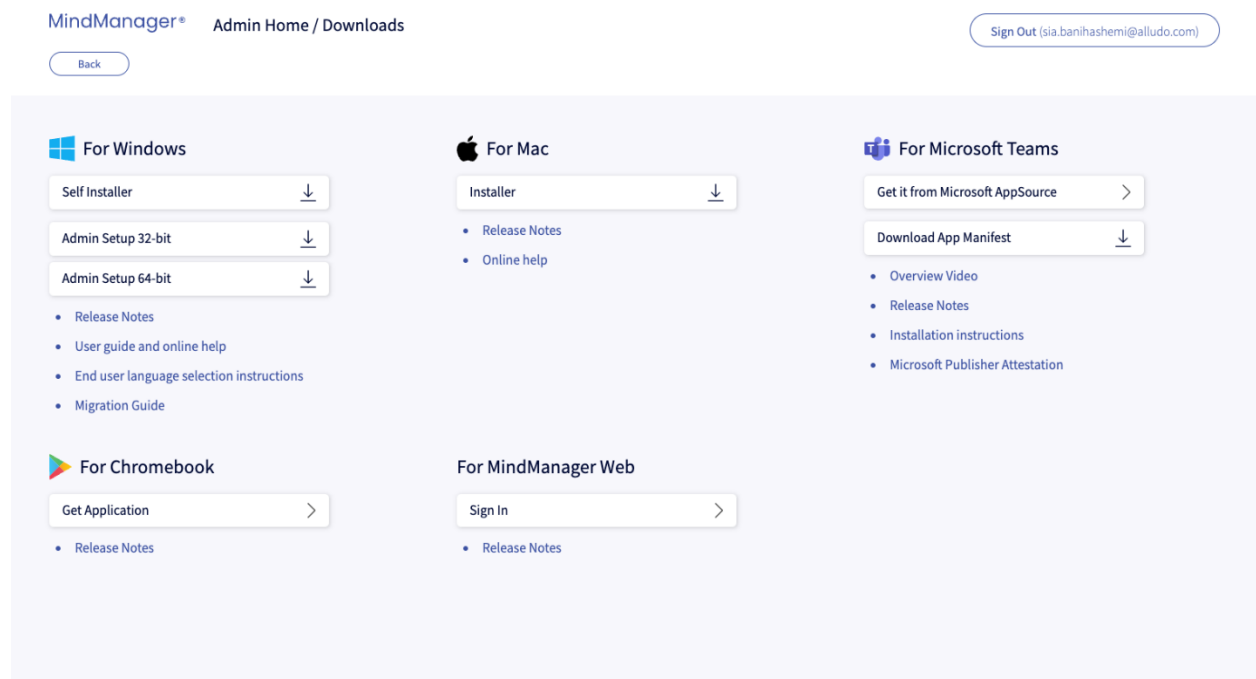

Get real-time updates on relevant MindManager activities when co-editing is enabled. Receive email digests when others edit or view your shared maps. These digests detail map edit specifics, conveniently delivered to your inbox. Easily interact with digests and quickly access settings directly from the email. Customize alert frequency and content types from your account settings, giving you full control over your updates. Stay informed, effortlessly.

NEW Downloads and resources available in the admin portal

MindManager Enterprise

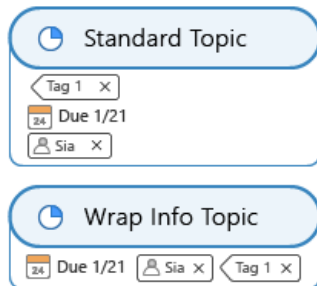

Exclusive to Enterprise customers, the admin portal now offers direct access to installation files and resources. These encompass the latest builds, release notes, useful links, single sign-on (SSO) documentation, instructional videos, and supplementary content for a comprehensive experience.

Miscellaneous enhancements

Above is a brief overview of the most significant updates in the latest MindManager version. Numerous other features, along with under-the-hood improvements and fixes, have been incorporated to further enhance MindManager's usability. These include:

- **Okta can now be used as an SSO identity provider (Enterprise):** For Enterprise users who do not use Microsoft or Google for SSO, Okta is now a supported alternative.
- **Multiple UX improvements in MindManager for Microsoft Teams:** Users can now conveniently retrieve both their personal OneDrive files and those shared with them labeled "Shared with you" within the MindManager interface. Additionally, obtaining share links for files from the file browser tab has been streamlined for user ease. 📷 [Get screenshots](#)
- **Efficient multi-type topic info (Windows):** Display diverse topic information concisely on a single line when it fits.

- **Precise configuration of MindManager SmartRules (Windows/Mac):** Tailor map behavior with SmartRules at a granular topic level.
- **Professional templates in more languages (Windows):** Access a diverse range of professional templates now localized in Chinese, Japanese, and Dutch.

This comprehensive update enhances MindManager's usability, making your work more efficient and enjoyable, while providing powerful tools for enhanced collaboration and productivity.
